Github | LeetCode

OBJECTIVE

Final-year B.Tech Computer Science student with strong foundations in Data Structures & Algorithms, C++, Java, Python, SQL, and problem-solving. Experienced in developing software solutions and working with coding, data processing, and analytical problems. Seeking an opportunity to contribute to coding assessment, problem creation, solution development, and technical content validation.

EDUCATION

Poornima Institute of Engineering and Technology (PIET) — **2023–2027**
Bachelor of Technology in Computer Science and Engineering | **CGPA: 9.4** *(till 6th semester)* — *Jaipur, Rajasthan*

EXPERIENCE

Data Engineer Intern | Celebal Technologies — **June – July 2026**
Remote
- Worked with Python and SQL for data processing, filtering, grouping, transformations, and analytical problem-solving.
- Applied SQL concepts including joins, aggregations, subqueries, CTEs, and window functions.
- Worked with data cleaning, validation, exploration, and Apache Spark/Databricks fundamentals.

Software Developer Intern | Vaibhav Global Limited — **June - July 2025**
Jaipur, Rajasthan
- Designed and implemented RESTful APIs with JSON-based schemas and CRUD operations for inventory systems.
- Built processing of **10k+** records, reducing billing errors by 95% and improving data accuracy.
- Engineered scalable data flow with real-time stock synchronization.

Frontend Developer Intern | QDOM Technologies — **June 2024**
Jaipur, Rajasthan
- Developed responsive websites using HTML, CSS, and JavaScript.
- Optimized UI layouts and styling, improving page performance and enhancing user experience.

PROJECTS

Inventory Billing System | Vite, React, TypeScript, Tailwind CSS, JSON — **June 2025**
- Designed JSON schemas, CRUD operations, and ETL pipeline for inventory transformation.
- Built scalable React architecture with real-time stock synchronization.

Car Rental Management System |HTML, CSS, JavaScript — **July 2024**
- Responsive rental platform with booking flow and availability tracking.
- Clean UI for car selection and rental management.

InsightX – ML Regression Model | Python, Pandas, Scikit-learn, Kaggle — **Jan 2026**
- Engineered end-to-end ML pipeline from ingestion to evaluation.
- Ranked 4th in Kaggle competition.

DataSentinel – Data Analytics & Monitoring Dashboard | Python, Streamlit, SQL, Pandas, Plotly, OpenPyXL — **July 2026**
- Developed a full-stack analytics platform with data ingestion and interactive visualizations for efficient business reporting.
- Implemented secure authentication, role-based access control and exportable reports.

SKILLS

Languages: C, C++, Python, Java, JavaScript, TypeScript.
Data Structures & Algorithms: Data Structures, Algorithms, Problem Solving, Time & Space Complexity.
Frontend: HTML5, CSS3, Responsive Design, React.js, Vite, Tailwind CSS, Bootstrap.
Database: SQL, PostgreSQL, MySQL.
Coursework: Object-Oriented Programming, AI/ML.
Cloud & DevOps: AWS (EC2, RDS, S3), Git, GitHub, Vercel, Netlify.
Tools and Frameworks: VS Code, Figma, Canva, Eclipse, **Familiar with:** Maven/Servlets.
Soft Skills: Public Speaking, Teamwork, Leadership, Volunteering.

ACHIEVEMENTS

- Solved **280+ problems** on LeetCode (Data Structures & Algorithms).
- Ranked **4th** in InsightX Kaggle ML Competition for building an end-to-end regression model.
- NPTEL Silver Medallist: Fundamentals of OOP (C++, Java, Python) | The Joy Of Computing Using Python.
- NPTEL Certified: Data Structures and Algorithms using Java.
- Completed Google Cloud Career Launchpad – Cloud Engineer Track.

EXTRACURRICULAR

- **Captain**, AWS Cloud Club at PIET Jaipur – Academic Year 2024–25
- Volunteered as part of the Content & Hospitality Team in the college annual cultural fest, 2024–25
